

Daniela Schejtman

PERSONAL PROFILE

My name is Daniela Schejtman, I'm 22 years old and I live in Paraná, Argentina.

I have always loved technology, so I began to learn about programming in 2020. After several courses that confirmed my passion for it, in 2021 I began to study a Technical Degree in Programming at UTN, and after a year, to continue my studies virtually and more oriented to full-stack development, I switched to ISPC to study a Technical Degree in Web Development and Digital Applications that I'm studying to this day.

I would love to have the opportunity to continue learning and perfecting myself in this field that I'm so passionate about, and be able to enter the IT world of work.
